Clouidia services are available globally through Equinix data centers

Clouidia's services are produced globally in Equinix data centers, in five continents and more than 200 data centers worldwide.

Utilizing Equinix Data Centers enables us to provide more efficient and reliable connections between our customers and our services – despite of location.

Equinix (Finland) Oy is Finland's leading provider of data center services, delivering high-quality services worldwide. In its data centers, Equinix combines world-leading businesses, their customers and partners with the only existing global network.
